

Global Wealth University — SmartBio User Accounts & Authentication Credentials

This document provides the exhaustive list of pre-configured **Firestore Authentication Accounts**, **Institutional Security Passcodes**, and **Role-Based Access Control (RBAC)** credentials for the **SmartBio Biometric Attendance & NUC Compliance Management System**.

1. Master Firestore Auth & Demo Accounts Roster

All accounts are auto-provisioned into **Firestore Authentication** and **Cloud Firestore (/users)** via the **1-Click Cloud Seeder** in the Administrator Portal.

Role	Avatar	Full Legal Name	Institutional Identifier	Email Address

System Administrator		Dr. Kola Balogun	ADM/2026/001	admin@smartb
-----------------------------	--	------------------	--------------	--------------

Course Lecturer		Dr. Olawale Adeyemi	STF/CSC/042	o.adeyemi@sm
Course Lecturer		Prof. Ngozi Okoro	STF/CSC/018	n.okoro@smar

Class Representative		Chukwudi Eze	GWU/ CSC/22/028	c.eze@student
-----------------------------	--	--------------	--------------------	---------------

Student (At Risk)		Benedict Uchechukwu	GWU/ CSC/22/001	b.uche@stude
--------------------------	---	---------------------	--------------------	--------------

Student <i>(Eligible)</i>		Folake Adebayo	GWU/ CSC/22/014	f.adebayo@st
-------------------------------------	---	-------------------	--------------------	--------------

Student <i>(Defaulter)</i>		Amina Mohammed	GWU/ CSC/22/035	a.mohammed@s
--------------------------------------	---	-------------------	--------------------	--------------

2. Institutional RBAC Gatekeeping Passcodes

To prevent privilege escalation during user self-registration, privileged roles require institutional passcodes issued by university administration:

GWU INSTITUTIONAL PASSCODES	
System Administrator:	GWU-ADMIN-2026
Course Lecturer / Faculty:	GWU-FACULTY-2026
Class Representative / Proctor:	GWU-PROCTOR-2026
Student Open Enrollment:	(No passcode required)

☁ 3. How to Provision or Reset All Accounts (1-Click Seeder)

If setting up a new Firebase environment or resetting data before project defense:

1. Open the application: <https://ndukwebenard-cyber.github.io/gwu-smartbio-attendance-system/>
2. Switch to the   **Administrator** portal.
3. Click the blue  **Seed Firestore Cloud** button in the top action bar.
4. The system will automatically:
 - Create all 7 accounts in **Firebase Authentication** with password `password123`.
 - Seed all academic records (`/users`, `/courses`, `/departments`, `/attendance_records`, `/flagged_exceptions`) into **Cloud Firestore**.
5. Once complete, you can sign in with any of the accounts above using the  **Switch User** button.
